

New EcoShell™ Under Construction on Isle of Palms

Wild Dunes, SC - Our latest EcoShell home is now underway on Isle of Palms, S.C. The 3000 sq. ft. home, with a water and golf course view, will make use of Insulsteel's UL 2 hour rated firewall technology as well as our new energy and environmental solutions. EcoShell insulated panels allow the home's entire drive under space to be conditioned and useable, adding value to the home. Integrated energy and environmental solutions including; InsulAire™ technology, which eliminates bacteria and airborne pollutants from the home. A smart lithium ion energy management system integrates solar energy, home demand, and the power grid to produce the most economic power for your daily energy use. The lithium ion battery can also be used as backup power when your electricity goes out, allowing you to live completely "off the grid." EcoShell's InsulAire™ purifies indoor air and kills bacteria.

EcoShell homes obtain the U.S. EPA's "Indoor airPLUS" certification for premium indoor air quality.

Insulsteel's EcoShell system is a highly insulated, airtight building enclosure that prevents airborne pollutants from contaminating indoor air quality. Health effects of poor indoor air quality can show up immediately, or they can take years to manifest. InsulAire systems filter airborne pollutants from both the outside and indoor air, providing a more healthy environment for your family. The effects of exposure to airborne pollutants

range from minor irritation of eyes, nose, and throat to debilitating conditions such as heart disease and

respiratory disease. [Learn more.](#)

Insulsteel Honored with Prestigious PRISM Award from Charleston Home Builders Association

Charleston, SC - Insulsteel, Charleston's most energy efficient custom design and homebuilding firm, was honored with their second PRISM Award in 2017. The awarded category was \$600,000 - \$699,000 detached single family home, presented during a ceremony by the Charleston Home Builders Association. The PRISM Awards, sponsored by The Post & Courier and South State Bank, have recognized Charleston's leaders in construction and design of new homes for the past 28 years. "Our

homeowner and entire design, engineering and construction team were extremely honored to receive the PRISM award." said Insulsteel CEO Steve Bostic. This high performance home previously won other National Awards including the US Department of Energy for Home Innovation, Certification at LEED Platinum Level and EPA Indoor airPLUS Award for superior indoor air quality. This award winning home, built on Johns Island, was designed and built by Insulsteel and features the company's EcoShell building enclosure technology.
